O-SCAN DIAGNOSTICS

Advanced AI-Powered Oral Screening System

CLINICAL ASSESSMENT SUMMARY

RISK (CANCER) (89.53% Confidence)

Based on AI analysis of the provided imagery and patient declaration, the system indicates HIGH RISK detected. This result has a confidence score of 89.53%. Please refer to the detailed observation section below.

Patient Reported Symptoms

Pain Level	Mild
History of Bleeding	No
Swelling Present	None
Duration of Symptoms	52
Medical History	22
Habits & Lifestyle	None Reported
Additional Signs	Trismus: Pass | Pain on Open: Yes

AI Feature Analysis

location	Lower lip
coloration	Ulcerated red area
surface	Irregular, mildly ulcerated
size	3.5 x 3.0 cm
stage	T1

O-SCAN DIAGNOSTICS

Advanced AI-Powered Oral Screening System

CLINICAL RECOMMENDATION:

IMMEDIATE ACTION REQUIRED: The system has detected features highly consistent with oral pathology. A biopsy is strongly recommended to rule out malignancy. Please refer this patient to an Oncologist or Maxillofacial Surgeon immediately.
